

Environmental Policy

*" Sustainable development, transparency and responsibility
they are our reason for being "*

LCN, dedicated to the manufacture of systems and components for the automotive sector, focuses its leadership and commitment on proper environmental management that generates success in the medium and long term and contributes to the sustainable development of the company, increasing customer satisfaction, offering products and sustainable services according to your needs and expectations, strengthening its credibility and trust and ensuring its excellence, competitiveness and sustainability as a first-rate provider.

For this, **LCN** establishes and maintains its Environmental Policy aligned with the general purpose of the Company and its Strategic Direction, based on the following commitments:

- ✓ Review, continuously improve and ensure the effectiveness of the environmental management system, in accordance with the requirements of the ISO 14001 standard, which adds value to the organization, fosters the establishment of improvement objectives and is the reference framework for protection of the environment and to respond to changing environmental conditions, in balance with the global and particular socio-economic needs of the company.
- ✓ Integrate environmental management in to its business processes and strategic management.
- ✓ Improve its environmental performance, protect the environment and avoid pollution by preventing and mitigating any adverse environmental impacts and the sustainable use of resources; reduce its GHG emissions and bet on energy efficiency and renewable energies; reduce water consumption and preserve its quality, as well as that of the air, avoiding contamination and deterioration of these two media and conducting responsible management of the chemical substances used.
- ✓ Increase beneficial environmental impacts, particularly those with strategic and competitive benefits.

- ✓ Comply with the legal, regulatory and other environmental requirements that you subscribe to.
- ✓ Consider a life cycle perspective to manage the environmental aspects of its activities, products and services and to prevent unintended environmental impacts.
- ✓ Mitigate potentially adverse effects of environmental conditions on the organization, ensuring its survival, sustainability and the supply chain.
- ✓ Promote risk-based thinking, determining and considering risks and opportunities that may affect the sustainable development of the company and the environment.
- ✓ Ensure that environmental objectives are established that are compatible with the context and strategic direction of the company and that they are met at all functions and levels.
- ✓ Communicate to the entire organization and interested parties the importance of effective environmental management in accordance with the requirements of the management system.
- ✓ Direct and support people and the responsibilities and authorities of all the roles necessary to contribute to the effectiveness of the system and the achievement of the planned objectives, ensuring that all material and human resources are available.
- ✓ Involve our collaborators and our supply chain in reciprocal responsibility and commitment, ensuring that externally supplied processes, products and services are in accordance with the relevant environmental requirements.
